

AUGER

BROCHURE

With the flip of a selector valve, drill a pilot hole before driving a post into hard or rocky soil.

The auger's powerful hydraulic motor makes the job easier and faster than ever before, saving you money. Additionally, the auger attachment can easily be added to existing Montana Post Drivers, requiring minimal modification simply bolt on and change hoses.

The simple selector valve allows you to switch from post driver operation to auger operation. It does not require any electrical hookups to your skid steer, and only one set of hoses is required to run the driver or the auger.

Key Features:

- 2" hex-drive connector
- Selector valve to make changing from post-driver mode to auger mode easy
- 4" Head, 4-tooth (standard)
- 6" Head, 6-tooth

	Model / Part #	Price	Shipping Weight	Shipping W×L×H	Working Weight	RPM
Auger Package, 4" Diameter, Sq Carbide Teeth Head, 1 5/8 Hex	400E	\$3,400	250	30×48×24	220	200-230
	750R	\$3,400	250	30×48×24	220	200-230
